

## Providing the assembled infrastructure elements that your business needs to run in the cloud.

With Novosco Single Tenant Cloud, you supply the workloads and manage your own virtualised environment, Novosco provides your business with a dedicated single tenant private cloud that is a cost effective, scalable, resilient, and flexible solution to meet the evolving needs of your business.

Designed to address the more demanding aspects of many hosted private cloud environments, Novosco Single Tenant Cloud employs a cloud-native approach based on a scale-out, software defined model.

### The solution

## Overview

### Challenges

- Rapid and scalable networking, storage and compute
- Need to focus on core business, not IT
- Pressure on capital budgets
- Maintaining an ageing on premise infrastructure
- Lack of in-house support & maintenance skills

### Use cases

- Pressure to execute business facing projects
- Reduce CAPEX for IT hardware and avoid refresh cycles
- Adoption of pre-designed solutions resident in high quality UK & Ireland data centres

### Benefits

- Cost effective
- Scalable managed service
- Resilient and flexible
- Architected to use network bandwidth more efficiently
- Green IT

## Features

- Dedicated capacity per customer, not a shared virtual environment
- Support and monitoring as standard to hypervisor level
- Dedicated hardware means you can re-use existing software licenses

## Maintain control

You get your own management server and spin up virtual machines (VM) as you see fit, just as you can today. We are here if you need us, but you own and operate the platform on Novosco Single Tenant Cloud.

## We monitor

Your workloads are your own, we cannot see or access them unless you give us permission. However you are not left in the dark; we proactively monitor the infrastructure we provide, up to hypervisor level, to make sure your business systems consistently run smoothly. If you have a concern about any of your workloads, our experts are ready and willing to help.

## Assurance

We run Novosco Single Tenant Cloud from the best data centre facilities in the UK and Ireland and always have a peer data centre in your region. This means you can rest assured that your business systems are safe.

## Flexibility

Novosco Single Tenant Cloud also works as part of our managed services offerings. Tailored to your needs, Novosco are able to accommodate any of the existing IT equipment you need to keep within the same data centre.

## Business Results & Benefits

Novosco Single Tenant Cloud enables your business. With Single Tenant Cloud you can reclaim time spent on monitoring, operating, and troubleshooting an in-house virtual infrastructure solution, freeing up time and resources to support customer or business-facing IT projects.

Novosco Single Tenant Cloud allows your organization to reduce CAPEX and on-premise maintenance costs, the service can also be classed entirely as OPEX meaning further cost savings can also be realised. With consistent, predictable billing, Single Tenant Cloud allows you to efficiently and accurately manage IT costs.

With a dedicated single tenant private cloud per customer, you can re-use your existing software licenses and protect the investment you've already made. Likewise we can host hardware assets within the same data centre suite and connect to your Single Tenant Cloud private network, ensuring that existing hardware investment lifecycles can complete and offering additional value to your business.

The data centre infrastructure on which Novosco Single Tenant Cloud is built is highly resilient, provides dedicated capacity and is monitored 24/7. This means that you are safe in the knowledge that your business systems are running smoothly.
